

Lucas Furlong – Software Engineer

517-213-6417 | trollinc.5@gmail.com | GitHub: lucas-codes-stuff | Secret Security Clearance

SKILLS & CERTIFICATIONS

- **Languages:** C# (.NET Core and .NET Framework), Python, VB.NET, JavaScript/TypeScript, C++/C
- **Database Management:** SQL, MySQL, PostgreSQL, Firebase, Supabase, Express.js
- **Frameworks:** Angular, React, Next.js, Node.js, CSS, HTML
- **Specializations:** Front and Backend Optimization, AI Integration, Systems Design

ON-THE-JOB EXPERIENCE

Software Engineer | QGenda – Remote

Period: Jul 2025 – Present

- Fixed performance bottlenecks causing timeouts on 10,000+ record systems for enterprise customers.
- Built a full-stack onboarding validation system used by 100+ healthcare organizations.
- Eliminated unauthorized data exposure and delivered SOX-compliant access controls for billing.
- Migrated 10+ legacy services to EF Core and integrated OAuth 2.0 with PGP encryption.
- Pioneered AI workflows (Claude) to automate feature delivery and reduce manual dev effort.

Software Design Engineer | Torch Technologies – Warren, MI

Period: Sep 2024 – Jul 2025

- Enhanced a 10,000+ record database, increasing data retrieval speed by 30%.
- Collected diagnostic data from vehicle systems using CANBUS, improving decision-making.
- Integrated software with specialized hardware, conducting tests to ensure cross-system compatibility.
- Deployed 15+ system updates with cross-functional teams, improving operational stability.

Software Engineer | OWL Computing Development – Walker, MI

Period: Apr 2023 – Aug 2024

- Delivered 5+ projects 30-45% ahead of schedule, saving clients \$50,000 by optimizing workflows.
- Modernized a Visual Basic loadcell calculation app to Angular, improving usability and efficiency.
- Upgraded outdated ASP.NET sites to .NET Core for security compliance, enhancing performance.
- Designed a responsive customer portal, supporting 1,000+ users and increasing engagement by integrating user feedback.
- Mentored 2 interns, enhancing team productivity by improving their coding skills and best practices.

PROJECT EXPERIENCE

Chromatica (Aug 2024 – Nov 2024)

Repository: <https://github.com/lucas-codes-stuff/chromatica>

- Trained a neural network on 10,000+ track feature vectors to predict user music preferences with ~96% accuracy.
- Leveraged Spotify's Web API to deliver personalized, real-time music recommendations.
- Deployed neural network, storing model parameters on Supabase for scalable cloud deployment.

Tech Used: Python, TensorFlow.js, Supabase, Spotify Web API, Deno, Angular, Ionic

File System Simulation (Dec 2020)

Repository: <https://github.com/lucas-codes-stuff/du-file-system>

- Implemented a block-style file system using a first-fit allocation method for efficient data storage.
- Developed custom commands (e.g., MOUNT, READ, WRITE) to manage volumes, files, and directories.
- Demonstrated proficiency in data structures, file I/O, and memory management.

Tech Used: C#, .NET Core, Command-Line Interfaces, Memory Management

EDUCATION

Davenport University

Bachelor of Science in Computer Science with Specialty in Artificial Intelligence

Graduated: Apr 2023 | GPA: 3.9
